Burn Care at Shriners Children's

Where Hope and Healing Meet

Leaders in pediatric burn care

Burn injuries can be among the most painful and traumatic injuries a child can sustain. Finding the right specialized care that is personalized to the child is the key to successful outcomes.

Shriners Children's treats all levels and types of burns, including scalds, chemical burns, electrical burns and flame burns. We're known around the world for our innovative, caring approach to treating burns in children. Regardless of the type of burn your child has experienced, our medical teams are driven to achieve the best outcomes for each patient and to provide:

- The physical and emotional support they need to heal
- A specialized treatment plan that minimizes scarring
- The plan to get them back to their daily life with minimal disruptions

Expertise and innovation

Every day our doctors and nurses help our patients and families find hope, compassion and excellent care for burn injuries. Our specialists have contributed to many of the significant advancements in acute and reconstructive burn care since we began treating children with burn injuries in the 1960s. They draw on their own pioneering work, giving children a greater chance of surviving and thriving after all types of burn injuries.

Our highly trained and experienced medical teams provide critical, surgical and rehabilitative care to children with varying degrees of new and healed burns, as well as burn-like conditions that can be treated with the same plastic, laser and reconstructive techniques used for burns. Specialized treatment is available for:

- All levels and types of burn injuries
- Skin grafting
- Scarring that has restricted mobility
- Trauma wounds from burns or injuries
- Pressure/friction injuries, such as treadmill burns
- Complex skin conditions, including Stevens-Johnson syndrome and toxic epidermal necrolysis (TEN)
- Congenital hairy nevus
- Port wine stains and hemangiomas
- Ear and hand anomalies

Compassionate wraparound care

The comprehensive support we provide means families will often find everything they need in one location. Services include:

- Occupational and physical therapy
- Psychological services
- Nutrition
- Social services
- Child life
- Orthotics and prosthetics
- School support and a makeup clinic

Burn care locations across the U.S.

Shriners Children's hospitals specializing in burn care are located in:

- Boston, Massachusetts
- Dayton, Ohio
- Galveston, Texas
- Sacramento, California

About Shriners Children's

Since the first Shriners Children's hospital opened in 1922, over 1.5 million kids have been helped. We are a leader in specialty care for children with orthopedic conditions, burn injuries, spinal cord injuries and other spine disorders, rehabilitation, sports injuries and craniofacial conditions. We also offer specialized services, including orthotics and prosthetics and motion analysis. We strive to provide the care and support our patients need to reach their goals and discover their full potential. All care and services are provided regardless of the families' ability to pay or insurance status.
